

JOSHUA NEFF, PharmD, RPh

1342 Rawhide • Derby, KS 67037 • (316) 619-4100 • NeffJ16@outlook.com

MISSION: To improve patient outcomes by focusing on their medication needs, financial resources, and overall individual situations. It is my passion and goal that each patient feel special and heard, as I work with both the patient and the physician to determine what is best for them from a clinical and financial standpoint.s

PROFESSIONAL EXPERIENCE

Broadway Pharmacy

Clinical Pharmacist

David Bergen, RPh

Wichita, KS

October 2018-Current

- Adapted quickly to an unique software program and different workflow than Dillons or Kex Rx used. Quickly became acclimated to the normal workflow and built relationships with both the patients and fellow employees. Previously no clinical cases had been billed, and despite limited time, quality completed cases were increased, EQuIPP scores compiled and presented, as well as improved adherence with the introduction of automatic refill programs.

Kex Rx Pharmacy & Home Care

Clinical Pharmacist

Joseph Koechner, RPh

Hiawatha, KS

December 2017-October 2018

- Completed pharmacist work at four individual stores, rotating amongst them three days a week. One day each week was dedicated to clinical work, involving a variety of activities including medication reviews, insurance coverage reviews, immunizations, and the overall development and management of further clinical services.
- Specific Clinical duties included working within the Mirixa, OutcomesMTM, and EQuIPP platforms, as well as developing expanded immunization protocols including the Shingrix protocol. Additional experiences include extensive diabetes education, working alongside patients of any age to assess and review the appropriateness of medication lists, providing patients with information to make best choices regarding insurance plans, ensuring proper immunization status, and promote overall health and wellbeing.

Dillons Pharmacy

Graduate Intern

Jamie Clowers, PIC, RPh

Wichita, KS

2016-October 2017

- Performed all tasks required of an intern, technician, and pharmacist short of verifying prescriptions. Continued development of critical interactions with patients, including de-escalation of any potential complaints or hostile situations
